

The screenshot shows the Arduino IDE serial monitor window for COM3. The window has a purple title bar with standard OS controls. Below the title bar is a text input field and a 'Send' button. The main area displays 15 lines of sensor data, each starting with a timestamp and followed by three values: temp, humidity, and moist. The data is as follows:

Timestamp	temp	humidity	moist
22:33:04.891	7	39	33
22:33:05.917	58	30	32
22:33:06.894	44	28	23
22:33:07.919	9	20	25
22:33:08.896	92	22	27
22:33:09.928	3	27	29
22:33:10.911	40	42	23
22:33:11.898	69	29	37
22:33:12.922	60	23	39
22:33:13.941	78	46	35
22:33:14.948	97	46	32
22:33:15.923	67	40	33
22:33:16.951	79	39	39
22:33:17.926	21	27	32
22:33:18.949	93	26	25
22:33:19.926	45	28	31

At the bottom of the window, there are checkboxes for 'Autoscroll' and 'Show timestamp', both of which are checked. To the right of these are dropdown menus for 'Newline' and '9600 baud', and a 'Clear output' button.

local variables. Maximum is 2048 bytes.
